Visual & Product Designer with 5 years of experience crafting cohesive digital experiences that unite brand identity with robust UX research and UI design. Specializes in taking products from user discovery, wireframing, and usability testing into scalable design systems and accessible interfaces. Strong cross-functional partner with front-end foundations (Vue, TypeScript) focused on shipping high-impact, human-centered digital products.

PROFESSIONAL EXPERIENCE

Graphic Designer (Contract) | Sept 2024 – Present

Canada's Top 100 Employers, Toronto, ON

- Engineered and maintained a centralized library of 50+ modular layout templates and responsive components, cutting cross-platform delivery turnaround by an estimated 30% across weekly production cycles.
- Architected high-impact B2B digital sell sheets, applying progressive disclosure and structured visual hierarchies to translate dense technical offerings into scannable, conversion-focused interfaces.
- Restructured dense, data-heavy content into intuitive multi-page information architectures, leveraging strict typographic scales, vertical rhythm, and baseline layout grids to minimize cognitive fatigue and maximize scannability.
- Drove end-to-end design execution from initial brief synthesis to final developer and stakeholder handoff, aligning cross-functional partners around technical feasibility and shipping high-impact deliverables on accelerated release timelines.

Product & Visual Designer (Freelance) | Sept 2021 – Jul 2024

Independent Practice • Remote

- Led end-to-end UX/UI redesigns and responsive web overhauls, translating client requirements into structured information architectures, wireframes, and production-ready digital interfaces.
- Conducted generative user interviews and usability testing sessions across multiple digital projects, synthesizing qualitative research into actionable wireframe iterations that resolved user friction.
- Built high-fidelity interactive prototypes to simulate complex task flows, streamline client stakeholder approvals, and validate usability before development handoff.
- Implemented and maintained front-end stylesheets (CSS/HTML) across custom web platforms (WordPress, CMS), aligning live production code with strict typographic scales, color tokens, and responsive breakpoints.
- Directed cross-channel visual identity systems, scaling brand standards across both digital web platforms and large-format print collateral (billboards, editorial, and promotional assets) with rigorous typographic governance.

Graphic Design Assistant | Aug 2020 - Aug 2021

Stellar Biotics LLC

- Assisted in preparing and structuring presentation decks and visual asset files for internal and client-facing use.

EDUCATION & CERTIFICATIONS

Google UX Design Professional Certificate | 2026

Algonquin College of Applied Arts and Technology - Interactive Media Design Diploma | Graduated 2021

CORE STRENGTHS

- **UX Research & Usability Testing**
- **End-to-End Prototyping (Low-fi → High-fi)**
- **Product Strategy & Problem Framing**
- **Design Systems & Token Architecture**
- **Information Architecture & Complex Workflows**
- **Responsive Web & Touch Ergonomics**
- **Brand Identity & Cross-Channel Systems**
- **Front-End Feasibility & Handoff**

SKILLS

- **Product & UI Design:** Figma, FigJam, Design Systems & Tokens, Wireframing, Interactive Prototyping, Component Libraries.
- **UX Research & Validation:** Usability Testing, Generative User Interviews, Information Architecture, User Flows, Heuristic Evaluation.
- **Visual Craft & Brand:** Design Systems, Web Typography, Visual Hierarchy, Adobe Creative Cloud (Illustrator, Photoshop, InDesign)
- **Technical & Front-End:** HTML5, CSS3, Tailwind CSS, Vue 3, TypeScript, Responsive Breakpoints, Developer Handoff

SELECTED IMPACT HIGHLIGHTS

- Accelerated cross-channel delivery velocity by 30% through the development of centralized layout systems and master component templates.
- Designed responsive B2B SaaS and financial tools that eliminate onboarding friction, streamlining data density and task completion speed.
- Engineered frictionless checkout architectures to reduce e-commerce cart abandonment using progressive disclosure and accessible UI kits
- Grounded product decisions in qualitative research, translating user interviews and iterative usability tests into scalable digital products.
